

UNNATI KADAM

Junior ML | Data Analyst

+91 82088 21254 | Mumbai, India | [Linkedin](#) | [Github](#)

Profile

AI and Data Science professional with a strong foundation in machine learning, data analytics, and problem solving, supported by hands-on experience through internships, research, and multiple hackathon achievements. Skilled in applying analytical techniques and building data-driven solutions to solve real-world problems, with a passion for developing intelligent systems and continuously expanding technical expertise.

Technical Skills

ML & Development:	Python, Java, C++, SQL, Scikit-learn, CatBoost, XGBoost, Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Hyperparameter Tuning, Model Evaluation, Supervised Learning, Algorithms
Automation:	Git, GitHub, Docker (Containerization), GitOps
Web & App:	Streamlit, Flask, HTML, CSS, JavaScript, SQLite
Workflow & Practice:	Git-based Collaboration, Supervised Learning, Hackathons & Presentations

Professional Experience

Performance Analyst: *Nebula Media*

September 2025 – Present

- Analyzed campaign and operational performance data to identify trends, inefficiencies, and opportunities for optimization.
- Monitored key performance indicators (KPIs) and generated regular reports to support data-driven decision making. Participated in agile practices including daily stand-ups and sprint planning.
- Built dashboards and data summaries to communicate insights clearly to cross-functional teams and stakeholders.

MLOps Intern: *Version Technologies*

January 2025 – March

2025

- Collaborated with cross-functional teams on deployment workflows and infrastructure automation.
- Built multi-stage Docker images for front-end apps, improving deployment efficiency.
- Authored internal Wikis and documentation to improve onboarding and automation reproducibility.

Projects

InterviewLY([Github](#))

InterviewLY is an AI-powered interview analysis tool built using Python, Streamlit, OpenCV, MediaPipe, DeepFace, FFmpeg, and OpenAI's Whisper API. It integrates modules for sentiment, emotion, speech clarity, eye contact, posture, and hand gestures to deliver personalized, real-time feedback from video interviews.

HealthML([Github](#))

Built a health risk prediction model using CatBoost with 97.2% accuracy. Designed a clean data pipeline and visualized key metrics for effective model evaluation.

UrjaAI([Github](#))

Built UrjaAI – an end-to-end AI-powered energy intelligence platform featuring XGBoost-LightGBM ensemble forecasting, recursive time-series prediction with confidence intervals, SHAP-based explainability, and what-if scenario simulation, transforming IoT sensor data into real-time recommendations for campus energy optimization.

Honours and Achievements

- 2nd runner up at E summit egf hackathon IIT BOMBAY
- Winner at Technovation 2024 VESP, Mumbai
- Runner-up at Pravinya 2024 for tech paper presentation
- 5th rank at Azeotropy Predictioneer ML hackathon IIT BOMBAY
- Cross-Chain Atomic Swap (CCAS) on blockchain preprint([SSRN](#))

Education

BTECH in Computer Science and Engineering(CSE)

*fr. Conceicao Rodrigues College of engg(CRCE), mumbai
2025 – 2028 | Present*

Diploma in Artificial Intelligence & Machine Learning

*Viva College of Diploma engg and technology(VCDET), mumbai
2022 – 2025 | Aggregate: 93%*
